Wonderland Tour: audience numbers

**Figures across 4 worksheets

General notes to accompany all figures across Sheffield and London:

The HSF team attempted to collate quantitative raw data/footfall following consultation with the evaluation team and other key members. In each location this involved a physical footfall count at regular intervals. Daily averages were calculated on these figures in order to estimate the total audience. It must be noted however that the figures below are **raw** and do not take account of repeat visits to sites as a result of students/workers/shoppers passing the location on multiple occasions in London and in Sheffield, or of return visits by regular Meadowhall visitors or of repeat transport patterns from pedestrians, bus, tram or car in Sheffield. For each calculation back up data has been stored. The HSF team can only estimate in certain cases the incidents of more engaged visitors who 'stopped and looked'. We have made an attempt below to annotate anomalies.
