### **Ailbhe Greaney *Street Flowers***

The movement of women from Vietnam to Paris between 1914 and 1954 is explored in this photographic exhibition *Street Flower*. Multi-coloured floral jackets worn en masse through the streets of Hanoi and Saigon conjure up the image of a moving garden. Here, aspects of Vietnamese sun, style and subtlety of substance, are re-imagined within a Parisian landscape.

### **Belfast Exposed *Futures***

Belfast Exposed Photography's new *Futures* programme promotes early-career photographic talent from Northern Ireland over the course of a year.

For this special showcase of work in collaboration with the CCI, the six Futures artists exhibit works from their individual projects: **Alberto Maserin, Jan McCullough, Jill Quigley, Joanne Mullin, Peter Evers, Ruby Wallis.**

These exhibitions are organised with the support of Institut Suisse Océan
