Subject: Invitation to speak at Vitamin D meeting

You don't often get email from jwelsh@albany.edu. [Learn why this is important](#)

[EXTERNAL EMAIL]

Dear Dr Cobice,

On behalf of the planning committee for the long running Vitamin D Workshop, I'm writing to invite you to speak at our upcoming meeting. The 23rd edition of the Vitamin D Workshop will be a virtual meeting professionally organized by the Keystone Symposium group. The dates of the meeting have been finalized as Oct 13 and 14, 2021. Our website at www.vitamindworkshop.org gives a history of our meetings, although details on the 2021 meeting have yet to be finalized thus are not yet posted on the website.

Based on your recently published work on MSI based localization of vitamin D in tissues, we would like you to participate in the meeting as an invited speaker for a session on vitamin D metabolites and methods. In addition to your talk there will be one more invited speaker as well as relevant promoted short talks in this session. Registration fees are waived so that invited speakers can participate in the entire meeting. Other sessions will focus on the VDR and Vitamin D biology in relation to bone/calcium, immunity and infectious diseases, metabolism and other topics. Invited speakers will have 20 min to present their lecture followed by ~5 min of Q and A.

Let me know if you would be willing to present an invited lecture, I would be happy to talk with you more about the program and your role if you have any questions. The Keystone virtual meeting platform is very sophisticated and they will be handling all the interactions with invited speakers to make sure things go smoothly.

I hope you are able to participate!

JoEllen
